To whom it my concern:

Our company has been using Serianni Construction to assist us with the maintenance of the plant and buildings at our Welland, Ontario operations for a number of years. They have completed a variety of building maintenance projects as well as replacement of an entire storage building.

All jobs have been completed to our satisfaction and they have met all schedules necessary to allow us to maintain our operations. At all times they have adhered to our plant safety rules and procedures and have taken all necessary safety precautions resulting in no incidents or accidents on our site.

Serianni Construction is a preferred contractor to Vesuvius Canada.

Al Bering
Maintenance Manager
