To Whom It May Concern:

The undersigned is pleased to provide the following letter of reference for the firm of Serianni Construction Limited. This firm has worked continuously with the City of Welland for the past 2 decades on various projects, ranging from building construction, masonry work, road and curb construction and various other renovations. We have been a repeat client with this firm and they have met our expectations on all projects involved.

The most recent project that Serianni Construction Limited completed for the City of Welland was the Structural Improvements to the Roof at the Youth Arena. This project consisted of reinforcement of the roof purlins and wood web members to increase the load carrying capacity. The arch tie members were also reinforced with a post tensioning system to increase the snow load capabilities of the roof. Serianni Construction Limited was very thorough managing this project and delivered consistently on The City of Welland's many requests for changes of design, costing and scheduling. I would recommend Serianni Construction Limited to any owner for their construction projects.

Please do not hesitate to contact the undersigned directly should you require any additional information.

Sincerely

A handwritten signature in black ink, appearing to read 'Ch. Herstek'.
